Ore	6
CFU	1
Periodo di svolgimento	September/october
Modalità di erogazione	In vivo/remote (categorie da regolamento)
Lingua:	Italian /English (if applicable)
Obbligo di presenza	Presence is highly recomemmended
Contenuti del corso	With the goal of enhancing students' confidence and overall proficiency in oral scientific communication, this interactive course presents the foundational skills and knowledge needed to prepare and deliver effective oral presentations. Students examine the principles of public speaking, practice vocal, verbal, and nonverbal delivery skills, and gain knowledge of expository and persuasive organizational patterns. In addition, principles of slide design and preparation are presented and discussed. The course emphasizes learning through practice. A workshop approach is adopted, and learning activities are organized around small-group work whenever possible.
Obiettivi di apprendimento	The main aims are to: • Understand the fundamental principles of oral scientific communication. • Organize scientific content using appropriate expository and persuasive structures. • Design clear and effective presentation slides and handouts • Communicate scientific information to both specialist and non-specialist audiences. • Participate actively in workshops, group discussions, and peer-feedback activities. • Improve confidence in public speaking within academic and professional contexts. • Apply effective strategies for scientific communication in academic and research environments.
Metodologie didattiche	The course emphasizes learning through practice. A workshopbased approach is adopted, and activities are organized in small groups.
Prerequisiti (se ci sono)
